The London Underground

The London Underground, also known as the *Tube* is the world's oldest underground railway. It was also the first underground railway to use electric trains.

The earliest parts of the underground system were begun in 1863. Today there are 270 stations and 250 miles of track! The *Tube* map is one of the most famous maps in the world. There are 11 lines, all shown in different colour on the map.

The first line ran between Paddington station and Farringdon street and opened on 10th January 1863. The second line was the Hammersmith and City railway which opened the year after.

Did you know?

About 3 million people go on the London Underground every day!

Most tourists buy tickets from stations but people who use the trains every day usually pay using an *Oyster Card*.

Queen Elizabeth I

Queen Elizabeth I (1st) was a famous Queen who ruled England, Ireland and Wales from 1558 to 1603.

Elizabeth's father was King Henry VIII (8th) and her mother was Anne Boleyn. She became queen when she was 25 years old.

In those days, queens usually got married so their husband could help them rule, but Queen Elizabeth I didn't want a husband. She wanted to rule England all by herself, which she did, for 45 years!

When Elizabeth was queen it was very exciting - there were new ideas about religion, wars with Spain and English explorers discovered new places.

Elizabeth loved learning and could speak six languages; English, French, Italian, Spanish, Greek and Latin!

Elizabeth was 69 years old when she died and was buried in Westminster Abbey next to her grandfather Henry VII (7th).

Did you know...?

Shakespeare and his actors performed for her at Christmas.
