HOW A COMPUTING LESSON SHOULD LOOK…

Individual component lessons throughout the unit are applied to create the composite final piece.

(5) Evaluate. Review and Reflect

(4) Active Learning and application of the component

(3) Teach/Model the components of the lesson

Constant live feedback and questioning throughout the lesson (AFL)

(2) Share LO, new vocabulary and context of the lesson

(1) Prior learning – retrieve and recall from previous lesson to improve automaticity. (Recall) Make connection to schema
